web-site: <http://www.pejkovicbojan.com>

Work Experience

Languages:

JavaScript: react, redux, nextjs

NodeJS: socket-io, mysql, express

DB: MySQL

PHP: using my own framework for api calls.

FE Developer (2021 – 2022)

[@quadro-consulting](#)

Web Developer (2010 – 2021)

For more than ten years i was working as a freelance web developer. I'm skilled in both frontend and backend.

On the server side I used only PHP for years but since 2018 I'm using NodeJS as well.

When it comes to front end I'm using React and Redux for the last two years.

Web projects:

Web-shops: [chairs.rs](#), [ekozmetika.rs](#), [goldenrose.bg](#),

Web-sites: [bupti.org](#), [furnix.rs](#), [ivbcosmetics.com](#),

[metalnestalaze.rs](#), [tradeexpress.co.rs](#),

[olepaikkonen.com](#)

HTML games: [wordzap](#), [crickler](#), [enigmadevice](#), [wired](#)

Other:

Currently studying Unity 3d with C#.

I also worked in C++ from 2000 – 2008, created windows apps for cash-registers and large truck scales.

Hobbies and interests

When it comes to programming in my own free time I'm developing the api framework apijX

(<https://github.com/bojanpejkovic/apijx>).

This framework is developed to enable the user to obtain automatically all the paths (routes) for api and admin panel solely with MySQL database completed.

I also took part in a js13k competition with a game I named "Wired" (<https://github.com/bojanpejkovic/wired>).

I'm a passionate chess player and that inspired me to make a browser chess game with video chat, using webRTC (not online).

Education

College: The Faculty of Organizational Sciences (FOS) – Information systems and technologies .

High school: Electrotech School »Nikola Tesla« - IT profile
